Rare Disease Day 2021: FITIMA Burkina’s Children visit the National Firefighters Brigade

For the celebration of the fourteenth International Rare Disease Day that is held every year the 28th of February, students at FITIMA Burkina Faso visited the firefighter company this Saturday, 27th of February.

This was an opportunity to learn about the work conditions of firefighters and to discover the specific logistics available like the ambulances and fire trucks.

In addition, our special “firefighters” of the day underwent intervention exercises. All of them went through the exercises. This educational outing was an entertaining and discovery time.
